ZiLOG

Z80®
Microprocessor Family

Discrete Devices and Embedded Controllers

Includes Specifications and Application Notes for the following parts:

Z8400/C00	Z8440/C40
Z8410/C10	Z8470
Z8420/C20	Z84C90
Z8430/C30	Z84015/C15

Product Specifications Databook

ZILOG

Z80® Family

Discrete Devices and Embedded Controllers

Includes Specifications and Application Notes for the following parts:

- Z8400/C00
- Z8410/C10
- Z8420/C20
- Z8430/C30
- Z8440/C40
- Z8470
- Z84C90
- Z84015/C15

INTRODUCTION

Zilog's Focus on Application Specific Products Helps You Maintain Your Technological Edge

A pioneer in microprocessor development, Zilog is today a worldwide leader in the development, design and manufacture of Application Specific Standard Products (ASSPs) for data communications, computer peripherals, and consumer electronics products. The company's unique building-block design strategy, its in-depth grasp of customer industries and needs, and its advanced design and manufacturing capabilities all contribute to creating products with superior reliability, performance and value.

Following the unparalleled success of the Z80® microprocessor, Zilog has continued to develop a comprehensive range of code-compatible Z80-based embedded controllers. These devices offer increased performance, while allowing code migration, at a reduced overall system cost.

The products featured in this Databook are fully supported by Zilog in terms of documentation, field applications support, and hardware and software development tools. For additional information on these, or other Zilog products, contact your local Zilog representative.

Z80® Family Databook

Table of Contents

Title	Page
Discrete Z80® Family	
Z8400/C00 NMOS/CMOS Z80® CPU	1-1
Z8410/C10 NMOS/CMOS Z80 DMA	1-37
Z8420/C20 NMOS/CMOS Z80 PIO	1-63
Z8430/C30 NMOS/CMOS Z80 CTC	1-79
Z8440/C40 NMOS/CMOS Z80 SIO	1-95
Embedded Controllers	
Z8470 Z80 DART	2-1
Z84C90 CMOS Z80 KIO™	2-13
Z84015/C15 IPC/EIPC	2-37
Application Notes and Technical Articles	
Z80® Family Interrupt Structure	3-1
Using the Z80® SIO with SDLC	3-13
Using the Z80® SIO in Asynchronous Communications	3-25
Binary Synchronous Communication Using the Z80® SIO	3-49
Serial Communication with the Z80A DART	3-53
Interfacing Z80® CPUs to the Z8500 Peripheral Family	3-63
Timing in an Interrupt-Based System with the Z80® CTC	3-87
A Z80-Based System Using the DMA with the SIO	3-99
Using the Z84C11/C13/C15 in Place of the Z84011/013/015	3-109
On-Chip Oscillator Design	3-113
A Fast Z80® Embedded Controller	3-123
Z80® Questions and Answers	3-129
Additional Information	
General Terms and Conditions of Sale	A-1
Product Packaging and Ordering Information	A-9
Zilog Representatives and Distributors	A-19
Literature Guide and Ordering Information	A-30
